## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a process for the solid phase synthesis of peptides, classified, e.g., in class 530, subclass 333.
- II. Claim 13, drawn to an apparatus for the accelerated synthesis of peptides by solid phase method, classified, e.g., in class 530, subclass 334.
- III. Claims 14-50, drawn to a vessel system for the accelerated synthesis of peptides by solid phase method, classified, e.g., in class 530, subclass 335.
- IV. Claims 51-61, drawn to a process for accelerating the solid phase synthesis of peptides, classified, e.g., in class 530, subclass 337.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I and IV are directed to different inventions which are not connected in design, operation, or effect. These methods are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and they have different effects (i.e. synthesizing peptides v. accelerating the synthesis of peptides). One would not have to practice the various methods at the same time to practice just one method alone.

The apparatuses of Groups II and III are different and distinct, each from the other, because they comprise one or more structural features that are mutually exclusive from the structural features of the apparatus of the other group.

The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one Group would not necessarily anticipate or even make obvious another Group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Because these inventions are distinct for the reasons given above and the search required for each Group is not necessarily required for the other Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed.

In addition, Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
